Career Objective

I consider myself as a motivated individual that believes in working hard and being open minded to learn new topics and things. Currently, I am seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my skills.

Professional Experience

Taboola - Tokyo Japan
Solutions Engineer - September 2023 to Present
- Primary responsibility included with helping with the Sales Engineering, Implementation, and Post Support of the different Taboola products
- Created custom hooks and UI designs for the Taboola products to help meet demanding requests provided by the clients

CloverTech Ltd. - Tokyo, Japan
Implementation Specialist - March 2022 to Present
- Working as an on-call specialist to help implement different SaaS products that CloverTech teams up with, such as Gravity R&D, SaleCycle, ShopLive, etc.
- Provided technical translations of the different SaaS products
- **Related Projects**
  - ShopLive API
    An API created using NodeJS, TypeScript, and Express JS to connect the live commerce service called ShopLive with the client's cloud services

Local Venture Group - Fukuoka, Japan
Full Stack Developer - June 2022 to September 2023
- Created web applications for clients using both legacy languages - PHP and modern languages and frameworks - TypeScript, React, and NoSQL DB
- Participated from the scope development step as I met with clients on developing up the requirements and different milestones of the development process
- **Related Projects**
  - Enriku Match
    A custom wordpress site developed for a start up company assisting with recruitment within the teaching field.
  - 0147 Open Innovation
    A site developed using the MERN stack. An application to host Fukuoka City's open innovation events where participants created accounts and submitted their ideas to the different events.

Education
